- The National Agency for Innovation and Research in Luxembourg
- 3 private and 3 public sector partners

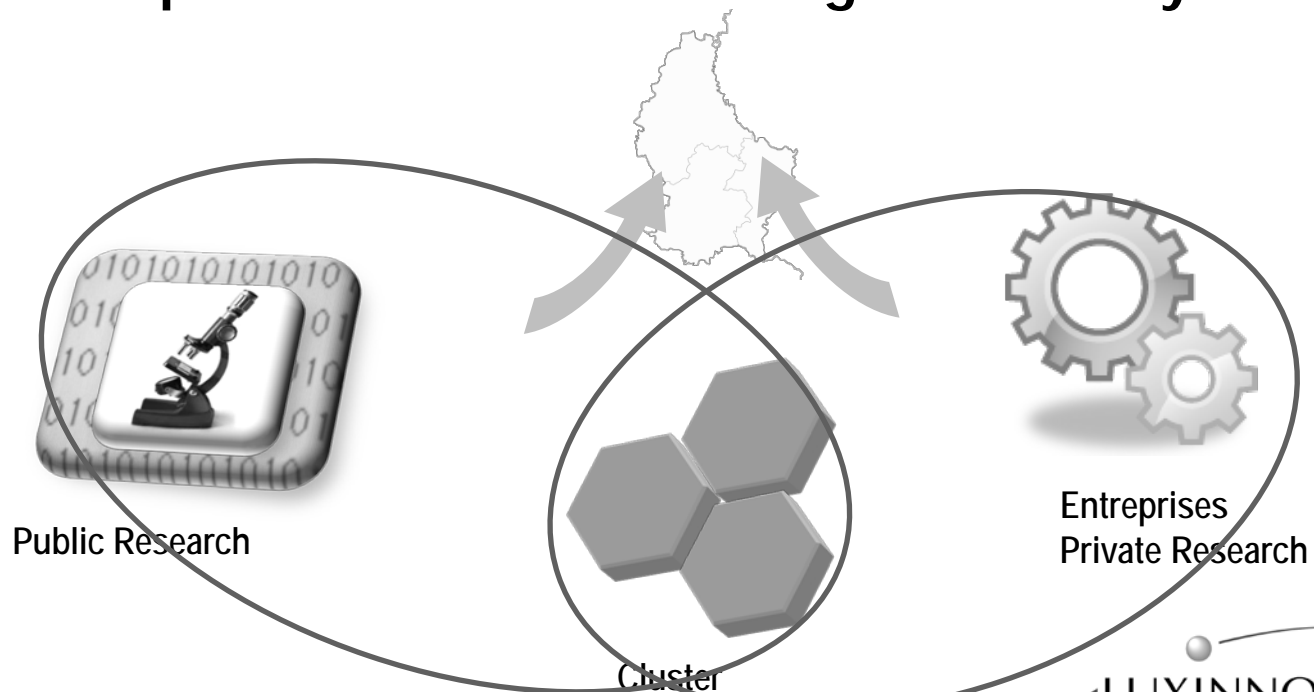

- Clients:
 - Small, medium-sized and large companies
 - Innovative start-ups
 - Public research organizations
- at the heart of the national innovation and research system

Cluster initiative

Cluster Goals

"...**increase competitiveness** and productivity, diversification and creation [...] of **innovative** firms, [...] the sustainable **development of the Luxembourgish economy.**"

Cluster objectives

■ The **Luxembourg Cluster Initiative** actively encourages networking between **the private and the public sectors**.

■ Focus is placed on key technologies, such as:

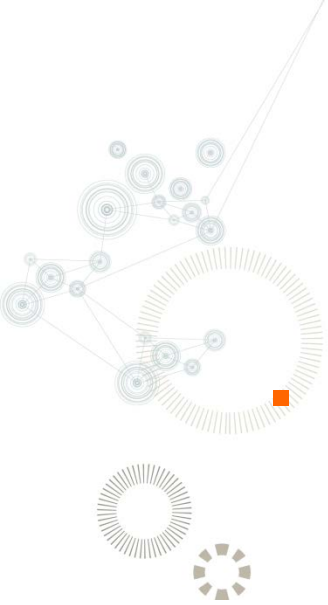

- Eco-Innovation Technologies
- Healthcare and Biotechnologies
- Information & Communication Technologies
- Materials Technologies
- Space Technologies
- Logistics and Maritime

Cluster objectives

- 
- Develop a **shared vision** for the future orientation of the clusters
 - Foster communication and the **exchange of knowledge**
 - Stimulate collaborative projects on a **national, European** and an **international** level
 - Enhance the **visibility** of the technological excellence and the **innovation potential** of the cluster members
 - Identification of **business opportunities** and **valorization** of research activities

Memorandum of understanding

- Luxinnovation joined the SnT Partnership Program “to intensify and formalise our common activities based on **mutual interests** and a **shared vision**”.
- collaboration in several fields:
 - cluster activities and industrial partnerships,
 - European research projects,
 - valorisation and support to spin-off companies,
 - events and dissemination of research results
